John Lee

EXPERIENCE

Zeller, Toronto, Canada — *Lead Full Stack Developer*

May 2021 – September 2024

- Oversaw the development of a data analytics platform using the MERN stack, enabling real-time data processing and visualization.
- Developed and integrated complex RESTful APIs to support dynamic data interactions between the front end and back end.
- Implemented robust security measures, including JWT authentication and role-based access control.
- Collaborated with product managers and stakeholders to define project requirements and deliver high-quality software solutions.
- Provided technical leadership and mentorship to a team of developers, ensuring adherence to best practices and coding standards.

Linktree, Toronto, Canada — *Senior Full Stack Developer*

November 2019 – May 2021

- Led the development of a robust e-commerce platform using the MEAN stack (MongoDB, Express.js, Angular, Node.js), facilitating seamless shopping experiences for thousands of users.
- Designed and implemented RESTful APIs to streamline data exchange between the front end and back end.
- Enhanced application security by implementing OAuth 2.0 for secure user authentication and authorization.
- Coordinated with UI/UX designers to create intuitive and user-friendly interfaces.
- Spearheaded the transition to a microservices architecture, improving system scalability and maintainability.

Culture Amp, Toronto, Canada — *Full Stack Developer*

December 2016 – November 2019

- Designed and developed responsive frontend pages and components using Angular, enhancing the user experience for over 2,000 users.
- Reviewed and assessed code contributed by team members, ensuring adherence to coding standards, performance, and best practices.
- Established and maintained coding guidelines to maintain code quality.

Culture Amp, Toronto, Canada — *Full Stack Developer*

September 2016 – December 2016

- Developed and maintained a scalable web application using the MERN stack (MongoDB, Express.js, React.js, Node.js), ensuring high performance and user satisfaction.
